Create a program to print Month's name based on input user has provided.
Use functions and following pseudocode:

MonthSwitchFunctionDemo
    main()
        do/while(y)

            menu()
            int input = inputFromUser()
            process(input)
            ->Do you want to Continue(Y/N):

    void menu()
        ***** Welcome to Formatted Calander *********

    int inputFromUser()
        ->Enter a value between 1-12
        return userInput

    void process(monthNumericValue)
        case -> Its Jan
        case -> Its Feb
